

Foundations

Everything has a beginning, and if something has a beginning, then it has a foundation, something upon which all else grows. This page is full of blocks, buttons, dice, and cards. Individually, these elements are quite useless, but given a context, put with other similar (or sometimes dissimilar) objects, they take on meaning.

A LEXIA is a structured set of writing, of text, that gives more meaning to the words than just what is written. The disposition of the writer, the context of surrounding writing, the metaphors contained within but not written, all contribute to the full meaning of the LEXIA, and as such all these elements are a foundation of the LEXIA.
